The Limbo Studio

Bespoke AI Consultancy — Where Creativity Meets Systems Thinking

■ Mission

At The Limbo Studio, we blend creativity with disciplined systems design to deliver AI solutions that people actually use. We bridge the gap between bold ideas and reliable implementation, ensuring every client gets automation that sticks.

■ What We Do

We help businesses move beyond the AI hype by designing **practical, human-centered AI systems**. Our end-to-end services cover:

• **AI Readiness Audits** → mapping workflows, identifying ROI opportunities

• **System Architecture & Prototyping** → tool selection, blueprints, rapid proof-of-concepts

• **Implementation & Training** → deploying secure, usable solutions and enabling teams to own them

• **Governance & Compliance** → privacy, auditability, and risk reviewed up front

■ Our Goals

• Human-Centered Adoption → AI that feels intuitive and empowering

• Creative + Pragmatic Solutions → merging design thinking with robust systems

• Scalable Playbooks → frameworks that shorten time-to-pilot and make results repeatable

• Client Empowerment → education and co-creation so you're never locked in

• Trust by Design → security, governance, and ethical safeguards from the start

■ Why Work With Us

Most AI consultancies focus on the tech. We focus on the **people who will use it**. With roots in creative studio work, our approach emphasizes design, storytelling, and usability. The result: solutions that not only work but are **embraced by your teams**.

■ Example Outcomes

• Cut **manual document handling time by 50%** with smart routing pipelines

• Launch a **customer support chatbot** that reduces tickets by 30% while staying on-brand

• Build a **personalized scheduling assistant** that saves managers hours each week

• Design a **dashboard ecosystem** that makes performance data instantly usable

■ Based in Minnetonka, MN — Serving Clients Across the U.S.
